

How to set up organics recycling at your business

1

Request a meeting with our Recycling Specialist by calling (805) 782-8424.

We will visit and perform a FREE waste assessment to determine what service levels are best for you.

2

Schedule trainings with our Recycling Specialist to educate your staff and show them how easy it is to have a great recycling program.

3

Set up an efficient food waste collection system.

We will provide FREE interior bins and signs. Make sure they are clearly marked and permanently placed alongside trash and recycling to make sorting easy for your staff. [Your waste hauler](#) will provide curbside bins.

4

Monitor bins carefully to make sure items are in the correct container.

Why recycle your food waste?

- **Keep it out of landfills**
Food waste makes up 31% of CA's landfills
- **Reduce greenhouse gas**
Food decomposition in landfills releases harmful gasses
- **Maximize our natural resources**
Instead of rotting, food waste will get composted into valuable soil
- **Show your customers that you care about SLO County**
Your business will be added to a published list of SLO County recyclers
- **It's the law**
CA Commercial Organics Recycling Law AB 1826
